

Earth Speakr

The trees are talking. It's time to start listening.

An artwork started by Olafur Eliasson, amplified by children.

Insight

Contemporary artist Olafur Eliasson creates an inclusive artwork aimed at and developed by the kids of the European Union.

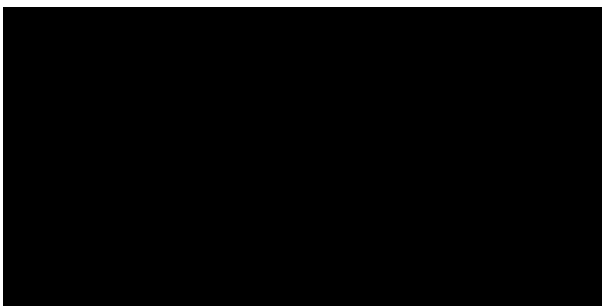

Commissioned to commemorate the German Presidency of the Council of the European Union, the work illuminates the unified reality of a shared future regardless of language or latitude.

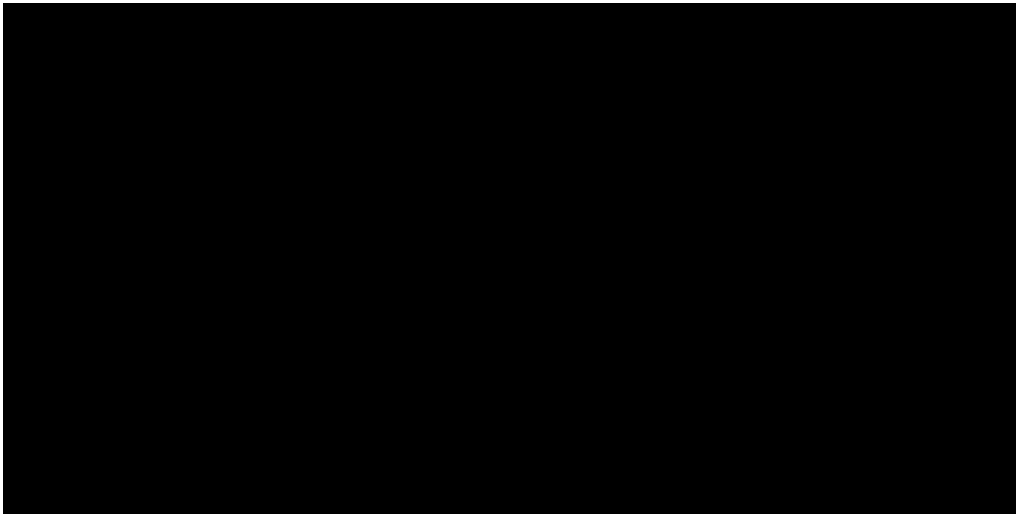

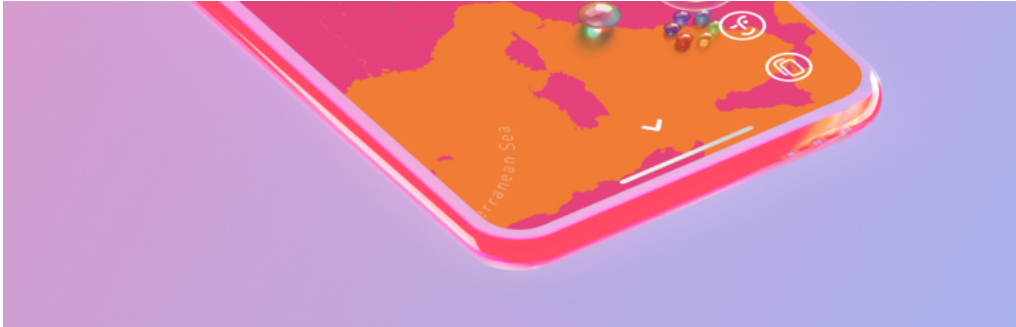

Idea

Earth Speakr gives a voice to both kids and the planet, inviting today's decision-makers and global leaders to listen.

The work enables kids to personify objects and leave messages in the world using their facial expression via the free app. Adults can view the messages in AR, as well as place collections anywhere in the world.

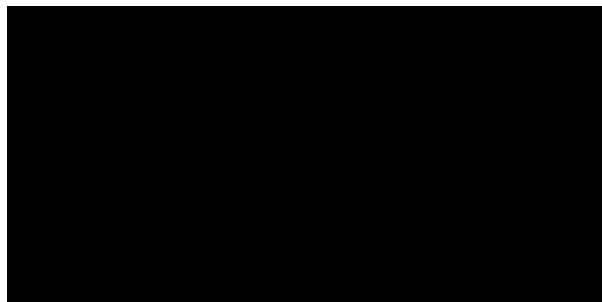

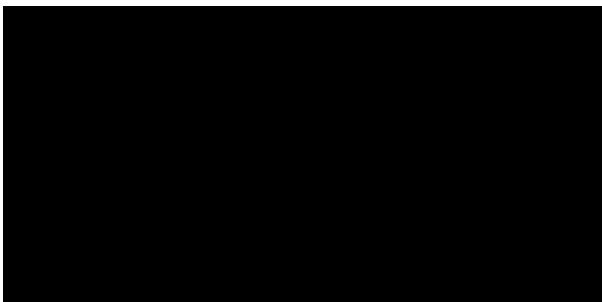

Impact

An artwork of empowerment and solidarity.

Launching in all 24 official languages of the European Union, kids are connected by being joint creators of the artwork. Collective concerns are surfaced both locally, and globally, to the people in power.
