About

Glyphy is a simple online tool that allows you to easily copy special characters & symbols (also known as glyphs) to your device's clipboard so that you can then paste them to any document or app you want. It doesn't contain every possible glyph out there (yet!) - and we have purposely omitted some that you can easily access from your keyboard -

however if you would like to see others added to the list let us know→

Glyphy is a free resource with no ads, so if you find it useful maybe consider donating 7 to help us cover our hosting costs.

Please note that some glyphs may appear slightly different when pasting, or not display at all, depending on the font used in your chosen device or application.

Made by <u>Overlay </u> − designed & built with in Brisbane, Australia.
