Killed by Google

Killed by Google is the Google graveyard; a free and open source list of discontinued Google services, products, devices, and apps. We aim to be a source of factual information about the history surrounding Google's dead projects.

Contributors from around the world help compile, research, and maintain the information about dying and dead Google products. You can join the

discussion on [GitHub](#), or follow us on [Twitter](#). A project by [Cody Ogden](#).

Press inquiries and other assorted death threats?
